About CIGOS 2026

The 8th International Conference on Geotechnics, Civil Engineering, and Structures, is jointly organized by the Association of Vietnamese Scientists and Experts (AVSE Global), the University of Architecture Ho Chi Minh City (UAH), and the University of Sydney Vietnam Institute (SVI), supported by [TC-309 of ISSMGE](#), and [the Vietnam Federation of Civil Engineering Associations](#).

This well-recognized conference builds on a legacy that began in 2010 in Paris and has since established CIGOS as a leading international platform for advancing research and innovation in civil engineering and related disciplines.

Under the theme “**Innovation in Planning, Design, and Civil Infrastructure for Resilient and Sustainable Transformation**,” this edition brings together a diverse community of researchers, practitioners, policymakers, and industry leaders to explore cutting-edge solutions for resilient and sustainable infrastructure.

Join us in Vietnam’s vibrant economic and cultural hub, **Ho Chi Minh City**, and help shape the future of global infrastructure through innovation and collaboration.

As with previous editions ([2017](#), [2019](#), [2021](#), and [2024](#)), the proceedings of CIGOS 2026 will be indexed in **Scopus** and the **EI Compendex** database, ensuring broad academic visibility and impact.
